

YUDAS MALABI

Malang, East Java | +62 822 5718 1297 | yudasmalabi@gmail.com | [LinkedIn](#) | [Portfolio](#)

Software Engineer with experience building reliable products, mentoring developers, and translating complex technical problems into practical solutions. I enjoy designing scalable systems, but I'm equally passionate about helping people understand and use technology. Whether building production software or teaching others, I care about creating things that are reliable, intuitive, and meaningful.

Skills & Tools

Hard Skills:

- **Backend** (Laravel, CodeIgniter, Node.js, Golang, Python, Java).
- **Frontend** (Bootstrap, Tailwind, Next.js, React.js, Typescript).
- **Mobile** (Java, Kotlin).
- **Database** (MySQL, PostgreSQL, Firebase, MongoDB, SQLite, SQL Server)
- **Others** (Payment Gateway, Google Cloud Platform, Docker, Redis, RabbitMQ, CI/CD Pipeline Gitlab/Github actions and Jenkins, ElasticSearch, OpenTelemetry, Kubernetes).

Soft Skills:

Business Understanding, Critical Thinking, Attention to Detail, Adaptability, Time Management, Problem Solving, and Leadership.

Work Experiences

PT Lumos Inisiatif Indonesia – Jakarta Selatan, DKI Jakarta Nov 2024 - Present

Fullstack Developer – Full time

- "Smartfren x Airpay", Built the reporting dashboard and backend systems behind millions of telecom subscription events, turning complex event streams into reliable services and real-time business insights. Designed concurrent event processing for high-volume workflows (MO, MT, renewals, and billing) with failover recovery using Go, RabbitMQ, Redis, PostgreSQL, CI/CD Pipelines, and Kubernetes.
- "Airpay Reporting Platform", Redesigned a monolithic reporting system into a scalable architecture, reducing report generation from nearly a minute to only a few seconds while improving maintainability and future scalability. Optimized background processing through Goroutines, Redis caching, PostgreSQL query optimization, indexing, partitioning, cron-jobs report-summarizer every 5 minutes to achieve a real-time data and Docker-based deployment with Jenkins CI/CD Pipeline, achieving up to 90% faster report generation.
- Revamped the Sentra Gamers web platform from Figma designs, improving responsiveness, UI consistency, page performance, and long-term maintainability using Laravel, Blade, MySQL, Bootstrap.

PT Humma Teknologi Indonesia - Karangploso, East Java

Nov 2022 - Nov 2024

Tech Lead • Fullstack Developer • Mentor & Assessor

- Delivered three production software projects across education and enterprise domains (Jurnal Mengajar, Kodelisensi, Sinarjaya Plasindo Inventory) using Laravel, React.js, MySQL, Firebase, GitHub Actions CI/CD, improving maintainability through SOLID architecture, queue-based processing, caching, indexing, and Agile development practices.
- Designed and implement an offline-first mobile attendance system using Kotlin combining RFID authentication, FaceNet for face recognition, MiniFASNet for liveness detection, SQLite offline storage, MySQL and Laravel APIs. The project later became the foundation of my undergraduate thesis and an IEEE conference publication.
- Mentored 20+ vocational teachers, 100+ students, and junior developers through industry-led training, code reviews, and real-world software engineering projects, helping bridge academic learning with production practices.
- Conducted technical competency assessments for 50+ participants across BBPPMPV BOE Malang and 7+ vocational institutions, providing structured feedback that encouraged continuous learning and professional growth.
- Led a team of 9 junior developers in architecting and developing the Mischool School Management System, guiding system architecture, technical implementation, and engineering best practices while mentoring day-to-day development.

Teaching Factory – State Polytechnic of Jember - Jember, East Java

Aug 2023 - Oct 2023

Fullstack Developer - Part-time

- Built the Teaching Factory House of Health Promotion platform, connecting educational content with health reporting and location tracking for field officers through collaboration between the university and local government using Laravel, MySQL, Leaflet Maps, REST APIs, and Bootstrap.

Dinas Kabupaten Gresik - Gresik, East Java

Jul 2022 - Apr 2023

Fullstack Developer - Remote

- Developed digital platforms for the Gresik Regency Government, including the Port Transportation Information System and Go-Tani Perikanan, supporting transportation monitoring, real-time reporting dashboards, fisheries assistance, E-Card management, using Laravel, MySQL, and deployed in VPS.

PT. Maxiland Bangun Mandiri – Jakarta Utara, DKI Jakarta

Fullstack Developer - Remote

- Developed and maintained Finema, an online learning platform for trading and investment education, integrating Laravel, React.js, MySQL, Xendit, Google Cloud Storage, YouTube API, and Tawk.to to deliver a reliable digital learning experience.

Jul 2021 - Aug 2022

Education Level

State Polytechnic of Malang - Malang, East Java

Diploma 4 in Informatics Engineering, 3.87/4.00

- Relevant Coursework: Algorithms and Structured Data, OOP, Web, Mobile, Database, Cloud Computing, and More.

Aug 2020 - Aug 2024

Certifications & Awards

- Hard Skills** (2019): BNSP Certification - Junior Programming
- SmkCoding Koinfo Bootcamp** (2019): Android Kotlin Fundamental
- Achievements** (2019): Web Technology Competition (Top 5 Nominators)
- Hard Skills** (2024): BNSP Certification - Database Driven Mobile Application Development
- Soft Skills** (2024): TOEIC (Test of English for International Communication) - 725 Total Score
- Presenter** (2024): IEIT (International Conference on Electrical and Information Technology)

Personal Projects

- Smart Attendance System** (2024): Designed and built an offline-first attendance system combining RFID authentication, on-device face recognition, and liveness detection. Deployed in production and later presented at the IEEE International Conference on Electrical and Information Technology 2024.
- Anemia Detection** (2024): Explored computer vision by developing a mobile application that detects anemia from eye images using deep learning inference, strengthening my understanding of AI integration in healthcare applications.
- Decision Support System TOPSIS** (2023): Developed a decision support platform that helps evaluate teacher performance using the TOPSIS method, transforming evaluation criteria into transparent and data-driven recommendations.
